-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 10 June 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Objections

Claim 13 is objected to because of the following informalities: the claim needs to end in a period. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17-20 and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Maroney et al. Maroney teaches a cabinet (10) comprising: a chamber (16) and a drawer (18) in the chamber with surfaces (60,58) defined therein. The drawer includes air flow openings (28, 29) in the surfaces which are positioned to define positions in the area. Please note: the batteries are not being positively claimed. Limitations in intended use/"for" statements are given no weight in the claims and when "battery" is used as an adjacent, it is also given

no weight in the claims. Furthermore, the cabinet/drawers of Maroney are capable of storing numerous articles, including batteries.

Claims 17-20 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Skonnord. Skonnord teaches a cabinet (Fig. 1) comprising: a chamber (10) and a drawer (52,32) in the chamber with an area defined therein. The drawer includes air flow openings (see Fig. 1) therein which are positioned to define positions in the area. Please note: the batteries are not being positively claimed. Limitations in intended use/"for" statements are given no weight in the claims and when "battery" is used as an adjective, it is also given no weight in the claims. Furthermore, the cabinet/drawers of Skonnord are capable of storing numerous articles, including batteries.

Allowable Subject Matter

Claims 1-16 are allowed. (The allowable subject matter being the cabinet having a chamber with side walls and a top cap; the top cap having a canted ceiling and a first overhang portion, with air flow openings, defined by a wide end thereof.)

Response to Arguments

Applicant's arguments filed June 10, 2004 have been fully considered but they are not persuasive. The examiner contends that both Maroney and Skonnord teach surfaces with air flow openings therein. Maroney's surface openings are specifically located in the sides and bottom of the drawer, while

Skonnord's openings are only seen in the sides. Please note that limitations in intended use/"for" statements are given no weight in the claims. However, even if the openings were specifically claimed on the bottoms of the drawers, for Skonnord, it would have obvious to put them there for further ventilation. Also, please note that a reference applied in a 102 rejection is not required to have the same use as that of the claimed invention, just the same structural features. Furthermore, as stated above in the art rejections, the cabinets of Maroney and Skonnord are capable of having batteries placed thereon; the batteries not being positively claimed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
